Fellowship

Northside Hospital Adult Reconstruction
(Cumming, GA)

Residency

Augusta University Medical Center
(Augusta, GA)

Medical School

Medical College of Georgia (Augusta, GA)

Board Certification

Board Eligible, American Board of Orthopedic Surgery

Fellowship Trained Leaders in the Southeast

During his time in medical school, he discovered his passion for orthopedic surgery and treating the ailments of the musculoskeletal system.

While in residency, his focus narrowed to a passion in joint replacement surgery due to the powerful, life-altering effects these procedures can have on people. His fellowship provided him extra, in-depth training in joint replacement surgery, including efficient joint replacements, partial joint replacements, and treating failed joint replacements. He performed over 900 cases in fellowship at a high volume center and is comfortable with any manner of joint replacement surgery or revision surgery.

Dr. Paynter is a Georgia boy, and has lived in Georgia his entire life. He grew up near Dalton, Georgia and then attended the University of Georgia. From there, he moved to Augusta, Georgia for the next 9 years, which encompassed his time in both medical school and orthopedic surgical residency at the Medical College of Georgia. He graduated from MCG as a member of the Alpha Omega Alpha Medical Honor Society. He then attended a fellowship in adult total joint reconstruction at Northside Hospital outside of Atlanta.

Dr. Paynter is fellowship trained in hip and knee replacement and reconstruction surgery, employing the most current treatments to alleviate pain and restore his patients to an active lifestyle. This includes technology-assisted anterior approach hip replacements, total knee replacements, partial knee replacements, and revision surgery for failed joint replacements. He has lived his entire life in the state of Georgia and loves Coastal Georgia.
